#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) This action is **FINAL**.                    2b) This action is non-final.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,7,10,13-15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by either Bell or Liao.

Both Bell (fig. 5) and Liao (fig. 1) show structure as claimed, including a suspended element 1,18, respectively coupled to a flexible extension member 30 of Bell, 10 (and/or handle straps) of Liao, which are coupled to the seat system. Note that both have clamping means for securing to tubes of the headrest.

While the function of applicants suspended vibration absorbing system is different than the prior art, there is no defining structure set forth in the above claims to sufficiently define the tuned vibration absorber and differentiate thereover, and as such, the structural elements found in the claims are met by the prior art to Bell and Liao.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3636

Claims 9 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Bell or Liao.

Whether the flexible extension member and suspended element are integrally formed is a matter of design choice, as is the nature of the attachment of the seat system mechanism.

Claims 3-6,8,11,12, and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pinckney, Bouche, Reed, Andersson, Inman et al, Lloyd et al, and Neckomoto et al show various features of the invention.
